

# *Stargazing Night at Mo-Ranch*

Saturday, September 1, 2018 | 8:30-10:30 p.m.

Just \$10 per person!

Join us for an evening underneath the starry Hill Country sky of Mo-Ranch while being guided through the night by Planetary Geologist, Eddie Hrcir. Our planet and star viewing event will include powerful computer-guided telescopes and astronomy lasers for observing all of the Hill Country's nighttime beauty.

## Viewing highlights include:

- Planets—Venus, Saturn, Mars and Jupiter. Mars will be making its closest pass to earth in 15 years!
- Andromeda—so far away that we will be looking back in time over 2 million years!
- Hercules Globular Cluster—with over 100,000 stars in a ball!
- Summer constellations
- Finding latitude and true north with the Little Dipper's star Polaris
- Constellations of the zodiac

Parking will be available at Chapel on the Hill, and seating will be provided.  
For event reservations or questions, contact 800.460.4401.
